

KODAK Ink & Toner Replacement Cartridges to showcase alongside The Recycling Factory at one of the world's largest tech, AI, and start up shows, 'GITEX Global 2025'.

Dynamic Cassette International Ltd. (DCI Ltd) are thrilled to be exhibiting at GITEX 2025 under our recycling and collection arm, The Recycling Factory, as well as the KODAK brand. We welcome all attendees to visit our stand, H4A-02, between the 13-17th October 2025 at the Dubai World Trade Centre.

GITEX 2025 is returning for its 45th year as one of the worlds largest and most influential technology trade shows, specialising in showcasing the latest technologies and innovations across multiple industries. DCI Ltd. are proud to stand alongside other market leaders and exhibit KODAK Ink & Toner replacement cartridges along with their recycling arm, The Recycling Factory. Both organisations are committed to sustainable printing solutions and look forward to sharing these eco-friendly innovations at GITEX.

KODAK, a globally respected and recognised brand, has partnered with DCI Ltd. since 2016. Their presence at GITEX 2025 represents the quality, reliability and cost effectiveness of ink and toner replacement cartridges. GITEX is a valuable opportunity for KODAK to showcase their ongoing commitment to innovative and sustainable printing solutions whilst also highlighting their determination to meet the diverse printing needs of customers worldwide.

All KODAK inkjet and toner replacement cartridges are re-engineered and print tested to ensure print performance is on par with original KODAK products. Growing pressures to adopt sustainable office equipment at home, in schools and across businesses means a rising demand for greener alternatives. Available for use in HP, Brother, Epson, Canon, and Samsung printers, KODAK is proud to present their environmentally friendly and cost-efficient products at GITEX 2025.

The Recycling Factory (TRF), DCI Ltd.'s recycling and collection arm, will stand alongside KODAK at GITEX 2025. Established by DCI in 2005, TRF is the industry's largest recycling company, collecting and recycling over 1 million used ink cartridges every month. Not only does this reduce the amount of harmful landfill but also significantly reduces costs as recycled printer cartridge's cost up to 70% less than original brand cartridges. GITEX 2025 also provides TRF the perfect opportunity to showcase their latest project, the recycling and

refurbishing of printers. With the commitment of reducing electronic waste, renewed printers offer businesses and individuals a cheaper, greener alternative to buying brand new without compromising on quality.

About KODAK

Kodak, founded by George Eastman in 1888, is a globally recognised American company known for pioneering consumer film photography. Since their launch, KODAK have expanded into all areas of print solutions including cameras, photopaper and inkjet and toner cartridges. Across all global operations, KODAK is deeply committed to sustainability with the aim of reducing waste, lowering energy consumption, and reducing harmful emissions. KODAK's vision and sustainable initiatives strongly aligns with DCI Ltd.'s, reflecting the long standing, trusted partnership between the two organisations.

About Dynamic Cassette International Ltd.

Established in 1983, Dynamic Cassette International Ltd. (DCI Ltd) is one of the world's leading remanufacturers of ink and toner cartridges. As industry experts, all R&D, ink formulation, package design and production are completed in-house at DCI's purpose-built production facility in Boston, Lincolnshire. Recently expanding into the refurbished printer market, DCI are committed to innovative printing solutions that offer a cheaper, more sustainable alternative without compromising on quality. In 2005, DCI established their own recycling and collection arm, The Recycling Factory, collecting over 1 million used cartridges per month. Serving thousands of resellers across the UK, DCI also operates its own house brand Jet Tec along with their very own e-commerce site Red Bus Cartridges.
